

## The Best of Kakadu Special August 17<sup>th</sup>- 23<sup>rd</sup>, 2018

Enjoying one of many waterfalls

This trip has been created at the special request of a family flying over from the UK. They wanted to experience the remote magnificence of the escarpment as well as the wonders of Kakadu's lowlands. During this week we will visit many of the highlights of the lowlands in Kakadu as well as spending 4 nights camping on the escarpment above the iconic Twin Falls. It really is an immersion into the best of Kakadu.

The program was designed by Cassie Newnes who has worked both in the Park supporting tourists to make the most from their Kakadu experience as well as having over 14 years experience hiking in Kakadu. Cassie is passionate about supporting people to have rich, engaging experiences in ancient, natural environments so careful consideration has been given to every detail including the best time of day to visit each site.

Two nights will be spent in accommodation during this trip to allow easier access to the highlights on the lowlands. We have sought to make this trip as cost effective as possible so have not included the cost of accommodation in the price of the trip. This is to allow participants to choose a level of accommodation that matches both their budget and their style. We are very happy to assist people with making a choice that matches them.

## **Inclusions**
